Class 7c1 (c1236-1240)

### Diagnostic features of class 7c1

The chinless bust continues.

A small, rather untidy, beard beside each cheek.

The same round eyes continue on from class 7b4.

The most diagnostic feature of class 7c is the slightly larger lettering.

A chevron barred letter (A) “𐌛” is occasionally encountered rather than the square shaped letter “𐌜”.

This class is recorded at Bury for the monevers SIMVND & IOAN only

Typical readings and styles of lettering and the initial cross seen in 7c1

## Class 7c2 (c1240-1242)

### Diagnostic features of class 7c2

Pellets in the curls and the legend are more often encountered.

Annulet eyes continue.

Occasional pellet on the chin.

As in 7c1 the chevron barred letter (A) “𐌲” is occasionally encountered rather than the square shaped letter “𐌸”.

This class is recorded at Bury for the moneyer IOAN only.

### Diagnostic features of class 7c3

Pictures & die charts for 7c1 (c1236-1242)

Ligated lettering underlined. Dies not recorded by Eaglen in Red

The die numbering on the chart below is the same as that used in Dr. Eaglen's publication<sup>1</sup> on the Bury mint, this enables any die pair to be referred back to his catalogue i.e. (Eaglen 98). Alterations and additions since his publication have required that the die lettering i.e. (A-a1) be, in part, altered, meaning this reference cannot be relied on when referring back to his publication. The number in brackets on the joining line indicates the number of coins that are currently recorded from these dies.
